Highlights

Functional and mood lighting

Read and work in harmony with how you feel, whether relaxed, energised or sociable. All through the power of light. Philips Hue beyond has two independent light sources—an uplight and a downlight—so you can create an endless mix of colours and white light.
Set functional lighting and add a touch of colour. Or create vibrant scenes and combine different colours to match your mood, whether it's to relax, energise or explore.

Be creative with colours

Play with light and choose from 16 million colours to instantly change the look and atmosphere of your room. Set the scene effortlessly with one touch of a button. Use a favourite photo and relive that special moment with splashes of light. Save your favourite light settings and recall them whenever you want with the tap of a finger

Sync with music and films

Extend your TV viewing experience to the whole room or sync light to your favourite music and see how light reacts to the rhythm. Download the third-party apps and discover the amazing things you can do with Philips Hue.

Create your ambience

Set the right ambience for any moment and decorate your home with warm to cool white light. Enjoy different styles throughout the year, no matter if it's the crisp white light reminding you of a spring breeze, the warm white light of a summer sun, or the ice cool daylight of winter. Connection with the Philips Hue bridge required for this functionality.

Wake up and go to sleep

Philips Hue will help get you out of bed the way you like to, helping you start your day feeling refreshed. The light brightness increases gradually, mimicking the effect of sunrise, and helps you wake up naturally, instead of being woken up by the loud sound of an alarm clock. Start your day the right way. In the evening, the relaxing warm white light helps you to unwind, relax and prepare your body for a good night's sleep. Connection with the Philips Hue bridge required for this functionality.

Light for your daily routines

Light influences our mood and behaviour. Philips Hue can help you to customise your daily routines into moments you can enjoy. Skip your morning coffee and get ready for the day with cool, bright white daylight that helps to energise your body and mind. Stay focused with finely tuned bright white light. Or put your feet up and relax with a soft glow of white light for the perfect end to the day.
