TELLDUS

WE ARE PROUD TO PRESENT:

TELLDUS Z-WAVE GATEWAY VER. 2

THIS IS Z-WAVE

- **Mesh network**
  the signals jump from one device to another which extends the range siginficantly.

- **Two-way communication** you will always get a confirmation in which status the unit you want to control is.

We have worked extremely hard with our upgraded Z-Wave gateway and now we are very excited to present version 2. This is probably the best Z-Wave gateway developed to date and it is completely unique in it's kind.

Not only stylish, it is also incredibly competent. It contains both a Z-Wave chip and a 433MHz chip that can both transmit and receive signals. It means that you can still use cheaper technology where you want and advanced Z-Wave technology where necessary.

Just as with its predecessors, it is compatible with a variety of devices on the market which already exists in many users' home.

Installation is admirably simple and all configuration is done in our web-interface Telldus Live! Here you can set up everything that you want the system to do for you. All schedules and events are also stored locally in the gateway. So should the internet connection disappear, your smart home will be up and running as usual.

We will continue to launch more smart accessory that utilizes Z-Wave technology, which will let you use the gateway to everything you can imagine.

Available for delivery in the end of July 2016.

- **Transmit and receive Z-Wave**
- **Transmit and receive 433MHz**
- **Stores events and schedules locally**
- **Modern design**

Technical specifications

Range	ca 30m (free sight)
Protection class	IP20
Frequency	868.42MHz (EU) + 433.92MHz
Voltage	5V/1A USB-adapter
Z-Wave chip	5:th generation Z-Wave Plus

Item data

Item no	EAN-13	QTY RP/IP/OP*	RP type
312692	7330985126925	1/6/12	Box

* RP = Retail packaging, IP = Inner packaging, OP = Outer packaging
