Accessory

Smart Friends Box

EAN 4007841029876

Functional description

Thanks to Smart Friends, everybody can equip their home with intelligent technology. The Smart Friends Box is the heart of the system. It is connected to the WiFi router and communicates wirelessly with the individual system components. This is where STEINEL has opted for the Z-wave wireless standard. Other Smart Friends partner products from ABUS, Paulmann and Schellenberg can also be used for automating the entire home. Chosen scenarios can then be controlled easily and intuitively using a smartphone or tablet via the Smart Friends app. With priority being given to data security, the building's lighting management system is now ready. Because no data is saved to the cloud, rather in your own four walls.
