

DISCREET AND **EASY-TO-USE** **MOTION DETECTION SENSOR**

We enhance our assortment of sensors to the smart home. This is a motion detection sensor that is easy to place wherever you want to in your home. It has a wide detection area and one sensor can manage to cover a room of up to 60m².

The sensor is battery operated which makes it very easy to place exactly where you need it the most. Use several sensors to monitor different parts of your home. We have also included a delay function for the off signal. Choose between 5 or 10 minutes delay by moving a jumper. This is very useful if you want the sensor to control a lamp.

The sensor is powered by two standard 1.5V AAA batteries, which can be purchased at most stores. It has a life length of

approximately 1 year and is easy to replace when time comes.

It is easy to add to our user interface, Telldus Live! where you can create schedules and events for even more applications. For example, let the sensor control more appliances at the same time. Add conditions so the sensor only works at a specified time. Or why not let it control both a receiver and a doorbell or send a message when a door is opened.

The sensor may of course be used stand-alone by connecting it to a single receiver.

In stock now for immediate delivery.

- **TellStick compatible**
- **Small and discreet**
- **Wide detection range**
- **Battery operated = easy to place**

Technical specifications

Range	ca 30m (free sight)
Protection class	IP20
Frequency	433.92MHz
Voltage	2x1.5V AAA Batteries (not incl)
Detection range	8-12 m
Detection angle	110°
Delayed off signal	off, 5 or 10 minutes
