PLUG-IN OUTLET WITH MANY **EXTRA FUNCTIONS**

COMPATIBLE WITH
TellStick

**ON/OFF
1000W**
TSR100

**DIMMER
40-300W**
TSR101

This is beyond doubt the best option when to choose a remote controlled outlet to control your lamps and other electrical appliances in your home. The outlets are available both with or without dimmer function.

They have many features which makes them very price worthy. They have 5 memories which ensures that the memory rarely will be full. But even if it should, you do not have to erase any codes manually. The "First In/First Out" function will automatically replace the oldest code with the newest one.

The receivers also have a status memory that will remember if the receiver was on or off if a power failure should occur. When the power returns it will start in correct mode.

The receivers are easy to add into our Smart Home user interface, Telldus Live! and you can control them just as you would do with any other receiver.

They may of course be used as stand-alone receivers by pairing them to any of our door/window sensors, our PIR sensor or a remote control.

In stock for immediate delivery.

- **TellStick compatible**
- **5 memories with FIFO function**
- **Status memory**
- **With or without dimmer function**

Technical specifications

Range . . . . ca 30m (free sight)
